

7. (Tormo Company, Huntington Beach Easement No. 272, Well No. Fee 5, Oil Purchase Agreement) The Executive Officer advised the Commission relative to the oil purchase contract tentatively agreed to between the State's Grantee (Tormo Company) and the Texas Company, as the purchaser of the crude from this State lease. The Commission was informed that the agreement contained a provision whereunder the purchaser could terminate the contract if the Grantee failed to comply with any production program which might be determined by operators producing more than one-half of the production in the Huntington Beach new field; and that if the State were to approve this contract in that form, it would have the practical effect of modifying Tormo's easement agreement to the extent that the State would no longer be in a position to determine the reasonable allowable production for Tormo's well. Therefore, the purchase agreement in its present form was highly inimical to the interests of the State. The Executive Officer advised the Commission further that conferences relative to this provision had been held with the State's Grantee, and that there were indications that the purchase contract could be amended or modified, in order to eliminate such objectionable features.

The Executive Officer pointed out further that the Grantee had an obligation to produce under his agreement, and that a portion of the production belonged to the State, and that in the absence of any approved agreement, the Grantee was actually marketing the State's royalty share of the oil without the State's consent; and that the Executive Officer was accordingly requesting authority from the Commission to approve the contract ONLY when the contract was finally presented in proper form and without the objectionable features.

Upon motion duly made and unanimously carried, the Executive Officer was authorized to negotiate with the State's Grantee, with the objective of removing the objectionable features contained in the oil purchase contract submitted to the State for approval. The Executive Officer was specifically instructed to bring the contract back to the Commission for formal approval.

8. (Tormo Company, Huntington Beach Easements Nos. 272, (Excluding Well No. Fee 5), 312, 337 and 352) The Executive Officer advised the Commission relative to the oil purchase contracts tentatively agreed to between the State's Grantee (Tormo Company) and the McCallon Refining Company, as the purchaser of the crude from these State leases. The Commission was informed that the agreements contained a provision whereunder the purchaser could terminate these contracts if the Grantee failed to comply with any production program which might be determined by operators producing more than one-half of the production in the Huntington Beach new field; and that if the State were to approve these contracts in that form, it would have the practical effect of modifying Tormo's easement agreements to the extent that the State would no longer be in a position to determine the reasonable allowable production for Tormo's wells. Therefore, the purchase agreements in their present form were highly inimical to the interests of the State. The Executive Officer advised the Commission further that conferences relative to this provision had been held with the State's Grantee, and that there were indications that the purchase contracts could be amended or modified, in order to eliminate such objectionable features.

The Executive Officer pointed out further that the Grantee had an obligation to produce under his agreements and that a portion of the production belonged to the State, and that in the absence of any approved agreements, the Grantee was actually marketing the State's royalty share of the oil without the State's consent; and that the Executive Officer was accordingly requesting authority from the Commission to approve the contracts ONLY when the contracts were finally presented in proper form and without the objectionable features.

Upon motion duly made and unanimously carried, the Executive Officer was authorized to negotiate with the State's Grantee, with the objective of removing the objectionable features contained in the oil purchase contracts submitted to the State for approval. The Executive Officer was specifically instructed to bring the contracts back to the Commission for formal approval.

9. (Grazing Application - Recession Lands, Owens Lake) Upon motion duly made and unanimously carried, the Commission rejected the bid of Mr. J.A. Engstrand, who under this bidder had agreed to pay five per cent above the highest bid. The Commission action was taken after full discussion and determination that the acceptance of any such bid would constitute a precedent and perhaps open the way toward general bidding of this character. The Executive Officer was instructed to notify Mr. Engstrand relative to the Commission's action on that bid.

Then, upon motion duly made and unanimously carried, the Commission determined to defer until the next meeting of the State Lands Commission any action upon the two remaining bids, each for twenty-five cents per acre per year for a five year lease of the area advertised.

10. (Sale of Vacant School Land, Application No. 4547, Monterey County) Upon motion duly made and unanimously carried, a resolution was adopted authorizing the sale of the $S\frac{1}{2}$ of the $NE\frac{1}{4}$ and $N\frac{1}{2}$ of $SE\frac{1}{4}$ of Section 16, T. 24 S., R. 8 E., M.D.M., containing 160 acres in Monterey County to Mr. Lewis Smith for \$800.00 cash. Mr. Smith was the only bidder pursuant to the advertising. The land is to be sold subject to statutory reservations including minerals.

11. (Abandonment of Mineral Leases, Nos. 428, 429, 430 and 431 - McLaughlin and Applogarth) Upon motion duly made and unanimously carried, the Commission approved the recommendation of the Executive Officer that permission be granted to terminate, as of November 15, 1945, Mineral Leases Nos. 428, 429, 430 and 431 (McLaughlin and Applogarth), under the provisions of Section 4 of those leases. The termination is to be subject to the following conditions:

(a) That a quitclaim to the State will be executed by the Lessees;

(b) That all structures erected on the Leases shall have been removed and all shafts or tunnels shall be sealed prior to acceptance by the State of quitclaims.
