OTHER PERTINENT INFORMATION:

1. The geological surveys authorized under the terms of the permit are for the purpose of obtaining shallow samples of the seafloor for geotechnical information. The data obtained is used in the design of offshore structures (pipelines, marine terminals, platforms, etc.) and in the technical and environmental analyses of offshore oil and gas operations.

The shallow samples are obtained using nonrotary techniques (dart, jet, percussion, grab) from a self-contained vessel. The vessel is typically no larger (50 to 150 feet in length, six-foot draft) than fishing boats used in the Santa Barbara Channel.

2. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the permit as part of the program for the project, as proposed, is consistent with its use classification.
3. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Adm. Code 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a categorical exempt project. The project is exempt under Class 6, the collection of data for information purposes where minimal or no disturbance of State land is involved, 2 Cal. Adm. Code 2905 (Class 6).

Authority: P.R.C. 21084, 14 Cal. Adm. Code 15300, and 2 Cal. Adm. Code 2905.
