CALENDAR ITEM NO. C.17 (CONT'D)

APPLICANT STATUS:

Applicant is owner of upland.

PREREQUISITE CONDITIONS, FEES AND EXPENSES:

Filing fee, processing costs, and environmental costs have been received.

STATUTORY AND OTHER REFERENCES:

- A. P.R.C.: Div. 6, Parts 1 and 2; Div. 13.
- B. Cal. Adm. Code: Title 2, Div. 3; Title 14, Div. 6.

AB 884:

12/06/88.

OTHER PERTINENT INFORMATION:

1. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Adm. Code 15025), the staff has prepared a Proposed Negative Declaration identified as EIR ND 438, State Clearinghouse No. 88011809. Such Proposed Negative Declaration was prepared and circulated for public review pursuant to the provisions of CEQA.

Based upon the Initial Study, the Proposed Negative Declaration, and the comments received in response thereto, there is no substantial evidence that the project will have a significant effect on the environment. (14 Cal. Adm. Code 15074(b))

2. The annual rental value of the bank protection site is estimated to be \$349.
3. The recreational dock is rent-free pursuant to Section 6503.5 of the P.R.C.
4. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.

CALENDAR ITEM NO. C 17 (CONT'D)

5. The recreational pier has been combined with the riprap bank protection in one permit for ease of recordkeeping and to eliminate the issuance of two separate permits for the same area.

APPROVALS OBTAINED:

United States Army Corps of Engineers, Fish and Game.

EXHIBITS:

INITIAL STUDY SUPPLEMENT

Project Description:

The proposed activity involves the placement of 4,500 cubic yards of fill and 900 cubic yards of riprap in the Sacramento River to reestablish an area lost to erosion. The fill would extend a maximum of 52 feet into the river to establish the top of the bank, and would then be sloped at a 2H:1V to the existing bottom elevation. The fill would subsequently be covered with 900 yards of clean riprap.

A floating dock would also be constructed, measuring 20' x 38'. The dock would be anchored by 3-12" diameter wood pilings extending 3-feet above the 100 year flood plane elevation. A 60-foot steel ramp would provide dock access, and would be secured at the top of the bank to sliding ramp supports at 3-feet above the flood plane elevation. A debris deflector, to be located between the existing wing dam and the proposed dock, would be secured to 2 pilings.

The project area will be re-planted with native vegetation where feasible to reestablish as much of the riparian nature of this portion of the bank as possible.

Area Description:

The proposed activity is located in a low-density residential area. A residence sits at the top of the bank, and another is located on the adjacent south property. The north lot is vacant.

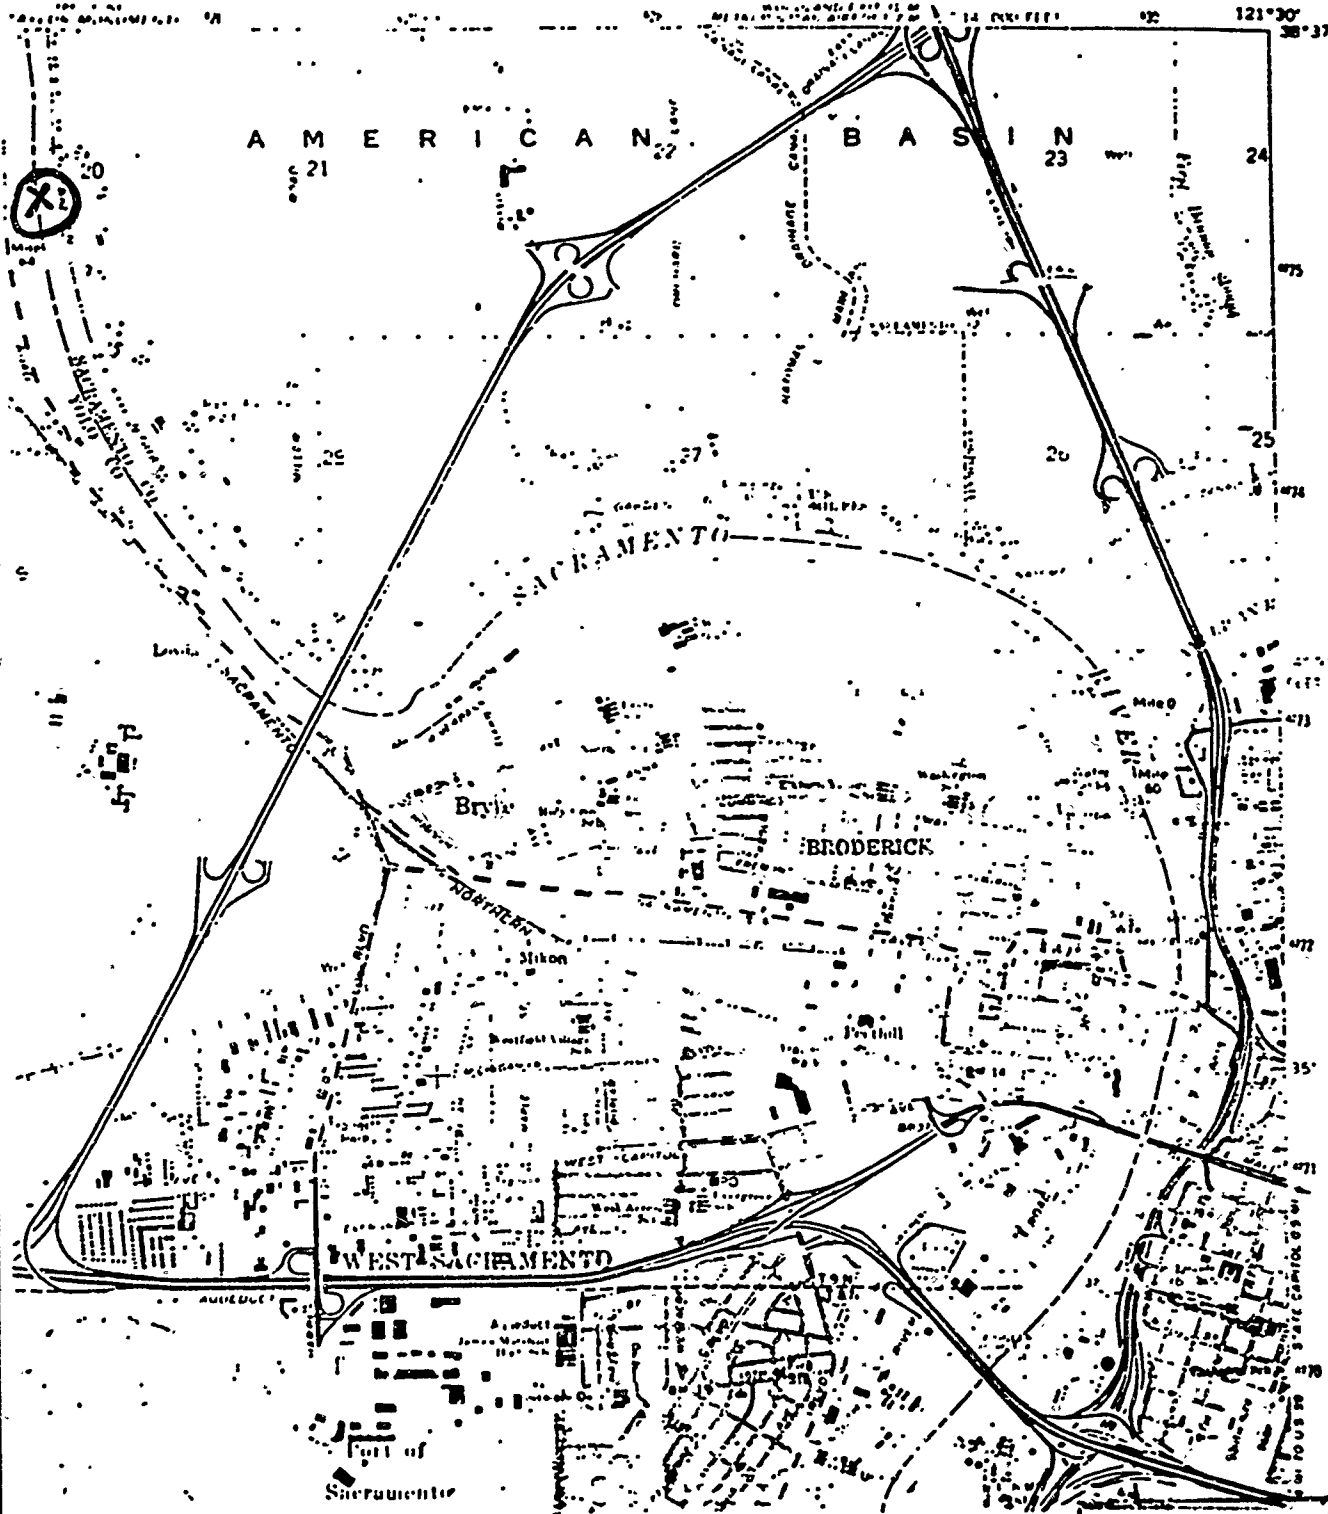

The bank has been eroded, is very steep, and is strewn with broken concrete rubble and slabs. There are cottonwood, willows and oaks along the top of the bank.
