OTHER PERTINENT INFORMATION:

1. Mineral Prospecting Permit PRC 6973 was approved for issuance to Utah International Inc. by the Commission on April 24, 1986, effective May 1, 1986.

BPH-Utah International Inc. was authorized to perform geologic mapping, rock chip sampling, and stream sediment sampling. All samples are to be extracted with hand tools and taken offsite for precious metal assaying. To date, Utah International Inc. has not commenced their mapping and sampling program. Work performed on their nearby federal mining claims has not been encouraging. However, BHP-Utah International Inc. has requested a one-year extension of their prospecting permit to accomplish their mapping and sampling program so as to evaluate the mineral potential of the State parcel.

2. Effective June 24, 1987, Utah International Inc. changed their name to BHP-Utah International Inc. to reflect its integration with the other minerals business of its parent company, the Broken Hill Proprietary Company Limited (BHP).
3. After reviewing the request for extension of the permit, staff believes there are no circumstances surrounding the project nor changes in the environment or the project that indicate the proposed action will have a significant effect on the environment.
4. The primary term of a prospecting permit is two years. The Commission may, in its discretion, extend the term for one additional year.
5. The extension is in the best interest of the State.
