**AREA, TYPE LAND AND LOCATION:**

Approximately 224 acres of State reserved mineral interest School Land in The Geysers Geothermal Field, Sonoma County.

**BACKGROUND:**

State Geothermal Resources Lease No. PRC 7810.2 was issued in December 1994, to Calpine Corporation (Lessee) as a negotiated subsurface (no surface use) lease. The drilling requirement provision of the Lease obligated Lessee to commence drilling a well before December 1, 1997. In November 1997, the Commission authorized a deferment of Lessee's drilling obligation to December 1, 1999. Lessee has requested another two-year deferment of this obligation to December 1, 2001. According to Lessee, drilling cannot be justified at this time because its power plant already has a sufficient supply of steam from existing wells on adjacent privately owned land. However, Lessee indicates that additional steam from the Lease may be required within the next two years.

CALENDAR ITEM NO. C69 (CONT'D)

The existing rental provision of the Lease specifies an annual rental of \$10.00 per acre. Commission staff recommends, as a condition for granting a second two-year deferment of the drilling obligation, and thus the right to continue to hold the Lease, that the rental provision be amended to increase the rent during the deferment period. For the period December 1, 1999, to December 1, 2001, Commission staff proposed an increase to \$25.00 per acre. Lessee has agreed to this condition.
