**BACKGROUND:**

Venoco is a privately held, independent oil and gas company that has filed an application with the California State Lands Commission (CSLC) to return oil and gas lease PRC 421 to oil production after ongoing production was temporarily shut-in in 1993. Based on current projections, the estimated productive life of PRC 421 would be twelve years and production is expected to be no more than an average of 700 barrels of oil per day (BOPD) in the first year, tapering off to approximately 100 BOPD by year 12.

**PROPOSED ACTIVITY:**

Currently, both PRC 421 wells (421-1 and 421-2) are shut-in and equipped with subsurface safety valves and packers. Venoco, Inc. proposes to place both 421 wells back into service. Under this proposal, well 421-2 would be equipped with an Electric Submersible Pump ("ESP"), which would be located inside the casing of the well
