PROJECT IN YUBA AND SUTTER COUNTIES**

PARTY:

California State Lands Commission
100 Howe Avenue, Suite 100 South
Sacramento, CA 95825-8202

BACKGROUND:

The northern area of Yuba City and Marysville is experiencing a high level of new residential Development and electrical demand for Yuba County is expected to grow at three percent per year. The current PG&E network serves over 70 percent of the electrical customers in Yuba County. The California State Lands Commission has jurisdiction over the transmission line's crossing of the Feather River.

PROPOSED ACTIVITY:

PG&E has determined that the Yuba 60kV network is deficient to handle this expected growth. To increase transmission capacity and improve service reliability to electrical customers, PG&E has designed the Pease-Marysville 60 kV Transmission Line Project, which includes construction of a second 8.3 mile long 60 kV circuit between the Pease and Marysville substations by rebuilding the existing Pease-Marysville power line to a double circuit pole line.

From the information that PG&E has provided, in consultation with the other California Responsible and/or Trustee agencies for the whole project, and in accordance with the California Code of Regulations Title 14, Chapter 3, §15000 et seq., the CSLC has determined to act as the California Lead Agency for the whole action of the Proposed Project.
