**CONSIDER 2009 BIENNIAL REPORT TO THE LEGISLATURE ON
THE MARINE INVASIVE SPECIES PROGRAM**

In 2003, the Legislature adopted AB 433, reauthorizing and enhancing California's Marine Invasive Species Program. Its purpose is to move the state expeditiously toward elimination of the discharge of nonindigenous species into the waters of the state or into waters that may impact the waters of the state, based on the best available technology economically achievable.

As part of the program, Section 71212 of the Public Resources Code (P.R.C.) requires the California State Lands Commission to submit a report to the Legislature. The report is to include, but not be limited to, all of the following:

- (a) A summary of the information provided in ballast water discharge report forms submitted to the Commission, including the volumes of ballast water exchanged, volumes discharged into state waters, types of ballast water treatment, and locations at which ballast water was loaded and discharged;
- (b) Monitoring and inspection information collected by the Commission pursuant to this program, including a summary of compliance rates, categorized by geographic area and other groupings as information allows;
- (c) An analysis of the monitoring and inspection information, including recommendations for actions to be undertaken to improve the effectiveness of the monitoring and inspection program;
- (d) An evaluation of the effectiveness of the measures taken to reduce or eliminate the discharge of nonindigenous species from vessels, including recommendations regarding action that should be taken to improve the effectiveness of those measures; and

- (e) A summary of the research completed during the two-year period that precedes the release of the report, and ongoing research, on the release of nonindigenous species by vessels, including, but no limited to, the research under this program.

Additionally, Section 71210 of the P.R.C. requires the California State Lands Commission to submit a report to the Legislature. The report is to include, but not be limited to, all of the following:

- (a) A description of the projects, the relative effectiveness of the technologies examined in minimizing the discharge of nonindigenous species, and the costs of implementing the technologies.

Attached as Exhibit A is the report prepared by the Commission's Marine Facilities Division in compliance with Public Resources Code Sections 71210 and 71212. The Commission's Staff proposes that the Commission accept the attached report and direct that it be submitted to the Legislature.
