2. On February 27, 1998, the Commission authorized a General Lease – Grazing Use with Jack Sparrowk and RCK Ranch, LLC, dba Sierra Valley Ranch. That lease expired on October 31, 2007. Sierra Valley Ranch, has since changed the name of the business entity to Bar One Cattle Company and is now applying for a new General Lease – Grazing Use to continue cattle grazing.
3. The number of animals permitted on the Lease Premises is restricted to those that can be supported by the forage and water available on this ephemeral range area taking into consideration forage and water reserved for necessary wildlife use. The estimated carrying capacity in animal unit months of the Lease Premises is approximately 60 AUMs. Cattle are grazed during the months of May through August in years when ephemeral forage is available. Grazing periods may vary over the term of this lease due to climatic conditions and/or other natural phenomena.
4. The Applicant is required to use good grazing practices to avoid overgrazing of the Lease Premises. The Commission may at any time during the Lease term, make an analysis of forage conditions utilizing accepted range management practices. Such analysis shall indicate grazing conditions and may include a determination of forage levels, at various times, during the year. The Commission can require Applicant to move cattle to or from any area of the Lease Premises where an overgrazing situation may exist for a period of time consistent with the grazing analysis. If supplemental feeding is utilized, distribution of feed will be such that livestock are not concentrated so as to cause damage to vegetation and soil and only supplemental feeding of certified weed-free feed is allowed.

State school lands and submerged lands are “significant” by nature of their public ownership (as opposed to “environmentally significant”).
