EXECUTIVE OFFICER’S REPORT

Executive Officer Curtis Fossum updated the Commission on the following items:

- At the January meeting the Commission directed staff to meet with Lake Tahoe stakeholders to discuss the methodology being used to establish rents. Staff held a meeting on February 29th at which the issue was discussed at length. Item 25 on the March 29th agenda is a status update on the issue and provides for the application of any changes the Commission may make to the methodology used to establish rent at Lake Tahoe to those applicable items on the March 29th agenda and tolling any challenges until the Commission makes a determination on the methodology. This is essentially continuing the practice the Commission used at the January 26th meeting. Additionally, a staff report on the Lake Tahoe rent methodology will be presented to the Commission at the Commission’s May meeting.

- AB 982 by Assembly Member Skinner, passed last year, grants the Commission authority to enter into a Memorandum of Agreement with the Bureau of Land Management that would assist in effectuating land exchanges in the California desert to facilitate renewable energy projects. That MOA is being presented to the Commission for its consideration as Consent Item 109 on the March 29th agenda.

- Commission staff, in partnership with the Department of Fish and Game, helped facilitate the removal of 116,000 cubic yards of sediment from the Batiquitos Lagoon Ecological Reserve.

- The Executive Officer acknowledged the retirement of Mike Bell, Senior Boundary Determination Officer in the Commission’s Land Management Division and his many accomplishments during the course of his distinguished career.
