**Public Trust and State's Best Interests Analysis:**

On April 17, 2006, the Commission authorized a General Lease - Recreational and Protective Structure Use to Kirk D. West and Gloria J. West ([Calendar Item C43, April 17, 2006](#)). That lease will expire on October 22, 2016. The Applicant is now applying for a General Lease – Recreational and Protective Structure Use for the existing improvements. The subject improvements are privately owned and maintained. The adjacent upland parcel is privately owned and developed with a residence.

The subject dock and appurtenant facilities are for the docking and mooring of boats. Recreational boating is water-dependent and is generally consistent with the common law Public Trust Doctrine. The California Legislature has identified private recreational boating facilities as an authorized use of Public Trust lands (Pub. Resources Code, § 6503.5).

The proposed lease includes certain provisions protecting the public use of the proposed lease area, including a limited lease term of 10 years and a non-exclusive use provision. The dock and appurtenant facilities have existed for many years at this location; the facilities do not significantly alter the land, the lease does not alienate the State's fee simple interest, and neither permanently impairs public rights. Upon termination of the lease, the lessee may be required to remove any improvements and restore the lease premises to their original condition. Based on the foregoing, Commission staff believes that the dock and appurtenant facilities will not substantially interfere with Public Trust needs, at this location, at this time, or for the foreseeable term of the proposed lease.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved. The bank protection will maintain and improve the integrity of the slough channel, which will help protect the Public Trust resources and values for recreational and navigational purposes by the public. For all the reasons above, Commission staff believes the issuance of this lease is consistent with the common law Public Trust Doctrine and in the best interests of the State.

**OTHER PERTINENT INFORMATION:**

1. This action is consistent with Strategy 1.1 of the Commission's Strategic Plan to deliver the highest levels of public health and safety in the protection, preservation, and responsible economic use of the lands and resources under the Commission's jurisdiction.
  
2. Staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084 and California Code of Regulations, title 14, section 15300 and California Code of Regulations, title 2, section 2905.

3. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code section 6370 et seq., but such activity will not affect those significant lands.
