Report to the California State Lands Commission For the Year 2013
March 23, 2017

The Crescent City Harbor District (District) is an independent Special District organized under Section 6000 of the California Harbors and Navigation Code. It is governed by a five person Board of Harbor Commissioners serving staggered four year terms. Elections are held every even numbered year, with two Commissioners elected on one four year cycle, and three Commissioners elected on the other four year cycle. The District has a staff of seven full time employees and nine part time employees. The District is organized as an enterprise district, meaning that it must earn most of its revenue from business activities it creates and fosters on the lands the District controls. The District uses this revenue to maintain and improve the lands and structures of the District for the benefit of the public.

The District currently controls two types of land, property that is owned fee simple by the District and the State Lands granted to the District in 1963. Table One shows the Del Norte County Assessor parcel numbers of each property, and the approximate acreage in each.

Parcel Number	Acreage
117-20-16	Unknown, undivided State Lands
118-020-29	9.51
117-170-11	18.58
117-180-11	4.3
117-180-21	3.04
Total	35.43 +

Figure One shows the boundaries of the District (Blue Line) and the approximate location of the high tide line (Red Line) marking the division of the District into state lands, seaward of the high tide line, and property owned fee simple, landward of the high tide line.

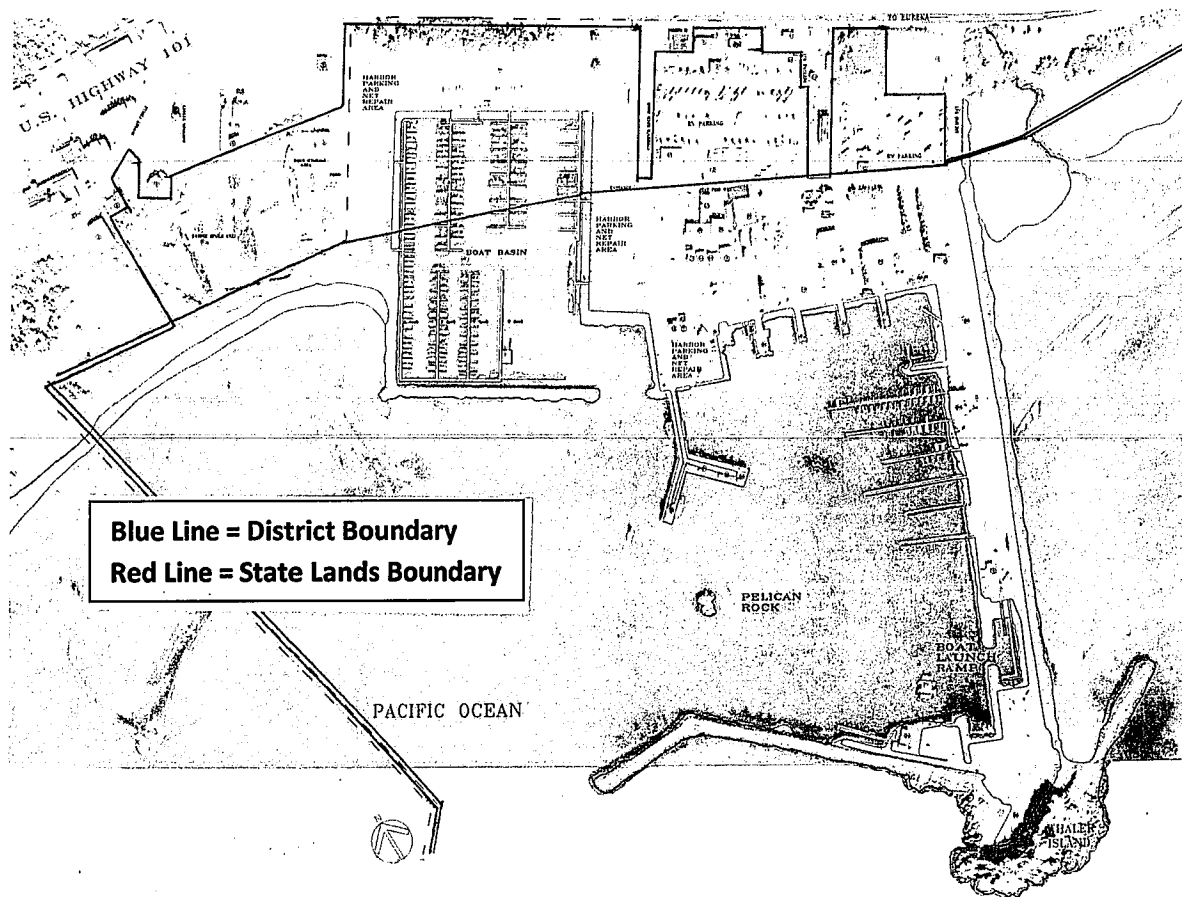

Figure 1. Crescent City Harbor District Boundary and State Land Grant Boundary.

A number of businesses and business activities are located on District property. Table 2 shows the businesses currently operating in the District, and the type of land on which they are located. A large majority of the businesses in the District are located on State Lands. This locational outcome reflects several interesting facts about the District. First, Crescent City Harbor is primarily a recreational and commercial fishing harbor. As such, most fishing related businesses need to be located on the water. Commercial fish unloading, fueling, ice delivery, moorage, and small vessel haulout and repair facilities all require direct access to the water to service vessels. Second, even businesses that do not directly depend on being adjacent to the water, such as restaurants and shops, find it beneficial to be near the water --their patrons enjoy viewing fishing activity and the ambience of being near the water. A final reason that most business activity in the Crescent City Harbor District is located on State Lands is that the businesses located on property owned by the District make more extensive use of the land. These business activities include RV parks and dredge dewatering ponds. There are fewer of them because each one requires an extensive amount of land.

The purpose of this report is to provide a detailed statement of all revenues and expenditures relating to the District's trust lands for the respective fiscal year. Because we know where businesses are located in the District, and because these businesses have lease agreements with the District that allow us to identify each source of revenue by business, we can identify which revenues arise on State Lands and which revenues arise on non State Lands. Identifying where expenses are incurred is more difficult. The District does not break out expenses by the location where they are incurred. While some expense items

would be obvious, such as repairs to the Outer Boat Basin which is located entirely on State Lands, other expense are more difficult to classify, such as repairs to the Inner Boat Basin which is located partially on State Lands and partially on property owned fee simple by the District. Other expense items, such as Office Supplies or Administrative Expense, will always be difficult to assign as they apply to the operation of the District as a whole, and not to the individual land parcels.

To construct a breakout of revenue and expense by type of land, we made a judgment call regarding the percentage of each revenue or expense category that should be attributed to each type of land. Columns two and three of Table 3 show the assigned percentages for each revenue and expense category. Column one shows the dollar values for each category from the current, provisional end of financial year profit and loss statement for the District.¹ The percentages in columns two and three are applied to the dollar quantities in Column one to calculate the dollar amount of revenues and expenses attributed to each type of land in columns three and four of Table 3.

¹ The current profit and loss statement for June 30, 2013 (the end of the District's most recent financial year) is included as an Appendix to this report.
