

Coastal Resilience Grant Matrix

	California State Coastal Conservancy	FEMA	NOAA	California Coastal Commission
Grant Program Information	<p>Climate Ready Program The Coastal Conservancy has authority (SB 1066) to work on projects to address the effects of climate change on coastal resources. Provides capacity building through offering technical assistance and staff expertise in SLR science, data collection, and adaptation planning.</p>	<p>Three Basic Hazard Mitigation Assistance (HMA) Programs: Pre-Disaster Mitigation (PDM), Flood Mitigation Assistance (FMA), Hazard Mitigation Grants Program (HMGP) PDM and FMA: Congressionally appropriated annually HMGP: Disaster specific</p>	<p>Coastal Resilience Grant Program The full funding opportunity is available at Grant.gov. Applications are due by March 15, 2017</p>	<p>CCC Local Coastal Program (LCP) Local Assistance Program</p>
Cost Match	Not Required	25% local/75% Federal	2:1 Federal to non-Federal (cash or in-kind) contributions. However, Cost-share requirement may be waived if “severe” economic hardship can be documented.	Cost match considered in evaluation but not required
Minimum Requirement	Public agencies, tribes and qualified nonprofit organizations	FEMA approved Local Hazard Mitigation Plan in effect at the time of the Federal Award	<ol style="list-style-type: none"> Projects must benefit coastal communities in one or more of the 35 coastal states or territories. Eligible funding applicants include nonprofit organizations, institutions of higher education, regional organizations, private entities, local, state and tribal governments 	Local governments in the Coastal Zone
Management Costs Available	N/A	Up to 10% for States and up to 5% for locals	N/A	N/A
Eligible Activities	The Climate Ready Program supports implementation of multi-benefit green infrastructure projects that reduce flooding and protect habitats, including development and implementation of vulnerability assessments, adaptation strategies, science-based scenario planning.	<p>PDM: Funds to prepare for flooding or other natural hazards (Mitigation Planning) FMA: Funds for recovery from flooding, projects must be flood focused, includes both hard and green infrastructure HMGP: Disaster relief fund</p>	Strengthening Coastal Communities –activities/projects must improve capacity of coastal jurisdictions to prepare and plan for/adapt to climate change-related hazards (sea level rise and extreme weather).	Grants are available to support development and certification of new or updated LCP’s with a focus on addressing climate change and sea level rise.
Environmental Requirements	CEQA compliance	NEPA clearance	NEPA clearance	LCP’s must comply with the requirements of the Coastal Act
Cost Effectiveness Minimum Criteria	N/A	In grant application, eligible projects must include a Benefit Cost Analysis	Minimum allowable request is \$100,000, maximum is \$2 million.	N/A
