3.18 MANDATORY FINDINGS OF SIGNIFICANCE

The lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where there is substantial evidence, in light of the whole record, that any of the following conditions may occur. Where prior to commencement of the environmental analysis a project proponent agrees to MMs or project modifications that would avoid any significant effect on the environment or would mitigate the significant environmental effect, a lead agency need not prepare an EIR solely because without mitigation the environmental effects would have been significant (per State CEQA Guidelines, § 15065).

3.18.1 Impact Analysis

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

No Impact. The proposed sale of School Lands does not have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife
species, cause a fish or wildlife population to drop below self-sustaining levels, threaten
to eliminate a plant or animal community, reduce the number or restrict the range of a
rare or endangered plant or animal, or eliminate important examples of the major
periods of California history or prehistory.

b) Does the project have impacts that would be individually limited, but
cumulatively considerable? (“Cumulatively considerable” means that the
incremental effects of a project are considerable when viewed in connection with
the effects of past projects, the effects of other current projects, and the effects
of probable future projects.)

No Impact. The proposed sale of School Lands will not have impacts that would be
individually limited, but cumulatively considerable. (“Cumulatively considerable” means
that the incremental effects of a project are considerable when viewed in connection
with the effects of past projects, the effects of other current projects, and the effects of
probable future projects.)

c) Does the project have environmental effects that would cause substantial
adverse effects on human beings, either directly or indirectly?

No Impact. The proposed sale of School Lands will not have environmental effects that
would cause substantial adverse effects on human beings, either directly or indirectly.
The proposed sale does not include any construction or modification of existing baseline
conditions.

Summary

Based upon the above considerations, CSLC staff believes that the proposed sale of
School Lands will not have a significant effect on the environment that requires either an
MND or an EIR to be prepared. The proposed purchasers of the School Lands parcels
plan to continue the existing uses (current baseline conditions) associated with the
respective parcels. The Project does not include any construction or ground-disturbing
activities. Any other uses and potential impacts are too speculative for evaluation.
