1. Anchors and weights are to be as recommended by manufacturer. Construct floating silt curtain of fabric fastened to a flotation carrier and weighted along the bottom line. Depth of curtain is the dimension of the curtain fabric extending below the flotation, i.e., hanging in the water. Upon completion of the work, remove the curtain in a manner that will prevent re-suspension of sediment into the water.

2. Final planting within work area to be completed per specifications.

4. Contours shown on the plan are based on NGVD 29.

5. Concrete anchor dimensions = 5' x 5' x 2', estimated at 3.75 tons each.
