**Subject:** PG&E Pease-Marysville 60 kV Transmission Line

Mr. Huitt,

Good morning. I have a question about the PG&E Pease-Marysville 60 kV Transmission Line. The existing utility poles are located on the south side of Pease Road. Is the proposal to move the poles to the north side of Pease Road? The City of Yuba City would like to see the poles relocated to the north side from the Pease substation to Live Oak Boulevard. Thank you.

} E-1

**E-1** Comment acknowledged. The existing Pease–Marysville Transmission Line between the Pease Substation and Live Oak Boulevard is located along the south side of Pease Road. MND Section 2.4.1, Transmission Line Right-of-Way and Additional Construction Work Areas, states that this portion of the future line would be located on the north side of Pease Road in an existing franchise or utility corridor area. Detailed maps of the exact location of all proposed poles can be reviewed at the CSLC.
