APPENDIX C

INVENTORY OF UNGRANTED TIDELANDS

SURVEY PRIORITY STUDY

SAN MATEO

DATA SUMMARIES

THESE APPENDICES ARE ONLY APPURTENANT TO THE MAIN REPORT
AND REPRESENT ONLY A FRACTION OF THE TOTAL DATA.

PREPARED BY THE STAFF OF THE
CALIFORNIA STATE LANDS COMMISSION
IN RESPONSE TO CHAPTER 706, STATUTES OF 1975

1981

APPENDIX C

INTRODUCTION

A data summary has been prepared for each of the coastal counties of California and for the offshore islands. These summaries are attached as Appendix C, to the Report to the Legislature of the Inventory of Ungranted Tidelands. The Inventory and the report were mandated by Public Resources Code Sections 6331 et seq.

The Tidelands Inventory program of the California State Lands Commission has, as its initial objective, the gathering and analyzing of data sufficient to enable the Commission staff to rationally plan a long-term boundary program for ungranted State-owned tidelands.

Analysis of the data summarized here has been limited to that level required to assign priorities to the various regions of the California coast for further, more in-depth study, which will lead toward actual mapping of State ownership.

This summary is limited in scope to the open seacoast of the State. Bays, rivers, estuaries, and lagoons will be covered in a later report. It is further limited to lands not granted in trust to other public agencies by the California Legislature.

Determinations resulting from an analysis of the data gathered were made solely with a view to establishing priorities, and should not be taken as an official position by either the Commission or Commission staff. For example, certain observations about possible artificial conditions at various sites have been made. These observations were based upon a preliminary examination of direct evidence (e.g., airphotos) of either current or historical artificial structures at or near the particular site. More in-depth investigations may well disclose other, more remote, artificial conditions at the site, which may affect the location of the boundary of State ownership.

TABLE OF CONTENTS APPENDIX C

MAP INDEXES — YELLOW PAGES

The base maps were prepared from U.S. Geological Survey 7½ minute quadrangle sheets. The final map is in black and white with elevation contours, roads, buildings, section lines, rivers, etc., but without the usual color overlays. The map covers a somewhat smaller area than the USGS quad sheets in order to reproduce them at half scale (1:48,000) on an 8½ x 11 standard sheet. The maps have been laid out with the shoreline approximately along the vertical center of the sheet. Shoreline mileage is listed along the waterward side and is the same shoreline identification system used by other public agencies, also listed on landward side are the summary map numbers. (Note: the shoreline mileage shown may not agree with the length determined, and used, by this inventory and listed within the data summaries by parcel. This discrepancy results because the inventory measurements were made from public records).

SUMMARY MAP — WHITE PAGES

The base maps for these pictorial summaries are the 1976-77 county assessor's plats. Shown on these maps are the upland parcels selected for study, artificial features, the limits of publicly-owned land, pertinent maps and court cases, and boundary line agreement locations. The data is symbolized according to the legend on the maps.

DATA SUMMARIES, BY PARCEL — PINK PAGES

These are computer print-outs which summarize the data accumulated during the inventory for each study parcel. The last column provides a means for the State Lands Commission's staff to categorize the types and degrees of problems existing for each parcel.

The information listed in these print-outs has been summarized. Consequently, what is shown may not be the exact wording or condition existing.

The study parcels are listed from north to south by a page/line number. This two-part number was assigned during the inventory. The first portion of the number is the Summary Map page number as assigned by staff. The second part is the individual parcel number given to the selected parcels in a consecutive north-south order for each Summary Map page. The page/line number is used throughout the inventory files to indentify each inventory parcel. It is arbitrary, and should not be confused with assessor's parcel numbers. (Following the Data Summaries print-outs is a cross-reference from assessor's parcel numbers to the page/line numbers.)

As required by the Public Resources Code, data obtained during the inventory are filed and are available for public inspection. This section provides a guide to what is obtainable and where to find it.

(1) Most maps listed on the Summary Maps are filed in the State Lands Commission Microfilm or Map Library by the letter designations listed. Recording data is also listed if it is available. Maps that are relatively easy to obtain or subject to change were not indexed, such as Parks and Recreation (P&R) Acquisition or Ownership Maps. However, they are pertinent to the "inventory" and are listed.

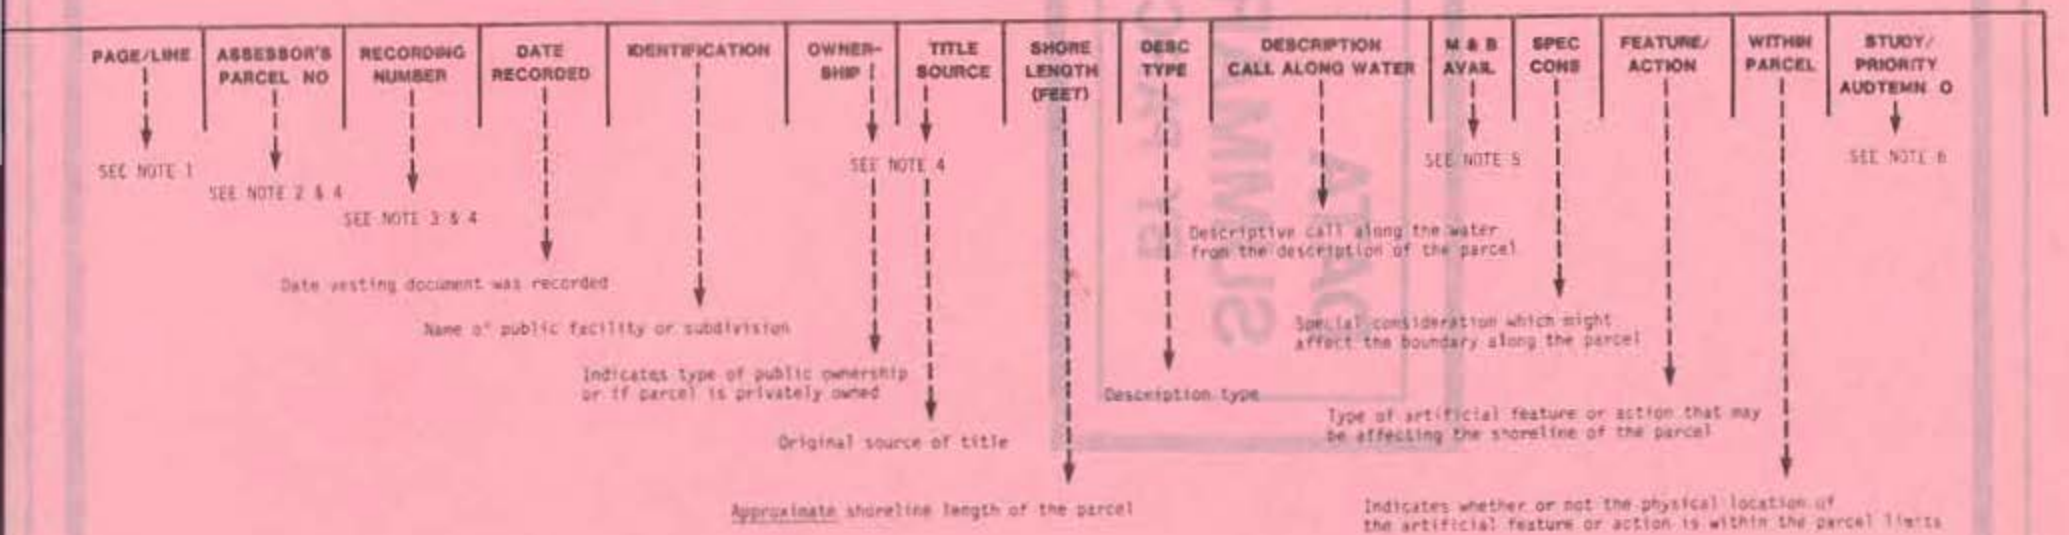
DATA SUMMARIES
BY PARCEL

DATA SUMMARIES BY PARCEL



(1) The SLC "Inventory" number that is given to the Summary Maps (page) and to the individual parcels (line), in a north to south direction, and may not have the same limits as County Assessor's Parcels.

(2) County Assessor's Parcel Numbers which identifies a parcel of land for tax purposes, and generally were used by SLC in acquiring vesting documents.

(3) Indicates the recording number of the vesting document acquired for this "Inventory". If a "see page/line" number appears in this column, it means that the parcel falls within a subdivision, and the referred to vesting document was acquired for the "Inventory", since it would be representative of all the parcels within the subdivision.

(4) From County Public Records as of 1977 State and Federal ownership as of Jan.1981.

(5) Identifies if a description or a map exists that has a metes and bounds survey of the shoreline, an evaluation of that shoreline survey is reflected in the "study/priority AUDTEMN O" column.

(6) This column lists the numerical value assigned to various factors that affect each parcel and, by a systematic comparison, an overall study/survey priority is established. The factors are:
1) A = Shoreline condition: an evaluation based on the discovery of artificial features or actions.
2) U = Identifies type of ownership and development.
3) D = Descriptive call along the water from the description of the parcel.
4) T = Evaluation of possible title problems.
5) E = Possible encroachment onto sovereign lands.
6) M = An evaluation of the metes and bounds description along the shoreline in the acquired maps and documents.

NOTE : THESE COMPUTER PRINT-OUTS ARE SUMMARIES. WHAT IS SHOWN MAY NOT BE THE EXACT WORDING OR CONDITION.

INVENTORY FILES

INVENTORY FILES - COUNTY

The following files were established for the inventory.

1. PARCEL SUMMARY SHEETS:

   a. Description: The Parcel Summary Sheet documents and summarizes the data discovered for a given parcel (see Exhibit A for a sample Sheet). A separate sheet is available for each inventory parcel. Note: These sheets are working documents; thus, the format and data included will vary somewhat from area to area.

   b. Files: Parcel Summary Sheets are filed exclusively within the inventory files. The files are arranged by county, and within each county, by page/line number.

2. ARTIFICIAL FEATURE/ACTION RECORDS:

The following artificial feature or action records were compiled during the inventory.

SHORELINE INSPECTION REPORTS (SIR)

a. Description: These reports describe and document the findings of the shoreline inspection work (usually actual on-site, field inspections). Each report consists of a) a short, concise narrative summary, b) detailed field notes (see Exhibit B for sample notes), c) snapshots, d) reference plats (reduced assessor's plats) and e) tide prediction table.

b. Files: The files are arranged by county, and the individual reports are filed chronologically. The Summary Maps included within also reference the Shoreline Inspection Reports (see white pages).

LIST OF SOURCES FOR OFFICE RESEARCH

a. Description: This is a complete list of all sources used during office research. Sources include aerial photos, selected maps, publications, etc. The list also serves as an index for identifying the source of data for other listings.

b. Files: The lists are compiled by county and are filed in front of the "abstract" file (see below).

ABSTRACTS FROM OFFICE RESEARCH

a. Description: This file contains all the "raw" material accumulated during the office research. Examples of material included are lists of possible artificial features from aerial photography, abstracts from articles, notes from historical maps, and copies of selected pages from publications. The format of the material included varies widely to meet the conditions of the sources.

b. Files: The abstract files are arranged by county. Within each county, the files are divided into three subfiles - "aerial photos", "maps", and "other".

SUMMARIES OF HISTORICAL ARTIFICIAL FEATURE/ACTION DATA

a. Description: These are tabulations of the historical artificial features and actions discovered during the inventory study. A separate summary is prepared for each county. For each item discovered, the summary provides a description, approximate location, dates, and reference source. The items tabulated in geographic order.

b. Files: The summaries are filed by county.

NOTE: All artificial feature or action records are filed exclusively within the "inventory" files.

3. MAPS:

a. Description: For the inventory, an attempt was made to acquire those maps applicable to the State/upland boundary. The success of this effort varied, depending primarily on the completeness of the county's map indexing system.

b. Files: All maps used in the inventory work are filed in the State Lands Map Library (Sacramento). The maps are indexed by the standard State Lands map indexing system. The Summary Maps also reference the applicable maps (see white pages).

4. DOCUMENTS:

a. Description: Documents acquired during the inventory consist primarily of vesting records, deeds, patents, executive orders, etc. An attempt was made to obtain the latest vesting document for each inventory parcel, but this was not always feasible.

b. Files: These records are filed exclusively within the inventory files. The files are arranged by county. Within each county, the files are separated by type of document, deeds, official records, executive orders, etc., and also by miscellaneous maps. Within the subfiles, documents are filed by recording number and miscellaneous maps are filed alphabetically. The Summary Maps also reference the miscellaneous maps (see white pages).

5. AERIAL PHOTOGRAPHY:

a. Description: Two sets of aerial photography were acquired for the inventory - one current and one historical. The current photography is in color and has a scale of about 1" = 400'. The historical photography varies in scale and date. Generally, the scale is greater than 1" = 2000' and the photography date is prior to 1942. For inventory purposes we selected aerial photography which covered relatively long stretches of shoreline; thus, better historical photography might be available for specific areas.

b. Files: All aerial photography used in the inventory is filed in the State Lands Aerial Photography File (Sacramento). The photographs are geographically indexed by the standard State Lands aerial photography indexing system. The Parcel Summary Sheets (see "1", above) also reference the aerial photographs.

6. LITIGATION:

a. Description: As part of the inventory process, court cases indexed by the State Lands Records section were researched. This work created two types of records: a) "Litigation - Case Listings", which list cases discovered within a geographical area and those cases selected for further review, and b) "Litigation Summary Sheets", which provide a preliminary legal review of the selected cases.

b. Files: The two specific records described above are filed within the inventory files. The material is arranged by county. Within each county the "listings" are filed first, followed by the "Summary Sheets" in order by case number. Court documents and other reference materials are filed in State Lands Legal section files in Sacramento. Court cases that appear to directly affect the State/upland boundary location are referenced on the Summary Maps (see white pages).

7. MISCELLANEOUS:

In addition to the files specifically established or used during the inventory (as noted above) the State Lands record system in Sacramento includes many other files which were researched for the inventory. The principal files utilized are listed below. Data from these files is included in the material previously described:

a. Tideland Sales

b. Swamp and Overflowed Land Sales

c. Granted Lands (Legislative grants)

d. Spanish/Mexican Grants (ranchos, pueblos, missions, presidios)

e. Boundary Line Agreements

f. Sovereign Land Locations

g. Public Notices

h. Work Orders

i. Publication Library

j. Historical Quads

k. Historical Topographic and Hydrographic Charts
